

# Cooling Regulations

## Here's what you need to know

Raw milk must be **10°C** or lower within **4 hours** of the commencement of milking

Raw milk must be **6°C** or lower within **6 hours** of commencement of milking; or **2 hours** of finishing (whichever is earlier)

Raw milk must be kept at or below **6°C** without freezing until it is collected or until the next milking

Additional milking into a vat should not cause the milk temperature to raise above **10°C**
